Personal Website | Linkedin | Git-Hub | Instagram Project | YouTube Project

PROFESSIONAL SUMMARY

Computer Science graduate focused on AI-driven product development and rapid prototyping. Built and launched multiple tech products, including an LLM-based research project, open-source SaaS tools, and a gamified cybersecurity learning platform. Scaled a vertical media brand to international partnerships (e.g., Swarovski Optik), combining technology, content, and community growth. I'm driven to work on high-impact challenges where I can turn emerging technologies into real-world value.

WORK EXPERIENCE

Digital Transformation Lead, *Ristorante Al Cervo* — 11/2025 – Present, Val di Rabbi (TN)

Led the complete digital overhaul of the business, designing a new high-performance website and optimizing the Google Business Profile for local SEO.

Co-Founder & Product Lead, *DeepSafe* — 09/2025 – Present, Remote

Launched the first Italian Gamified Cybersecurity Platform, designed to democratize digital safety and AI literacy through interactive learning.

Founder, Content Strategist, Video Editor, *Mountain Fauna Lover (Media Brand)* — 07/2022 – Present, Trentino Alto Adige

- Built and scaled a vertical outdoor media brand to over 20k followers on platforms including YouTube, Instagram, and TikTok.
- Partnerships with industry leaders like Swarovski Optik and Ollin

Shop Manager & Sales Associate, *Rabbi Explorer* — 2019 – 2021, Val di Rabbi (TN)

Managed daily shop operations and customer relations such as sales advisor for premium e-bike equipment.

EDUCATION

Bachelor in Computer Science, *University Of Verona* — 2022 – 2025, Verona (VR)

- Thesis: "Understanding and Predicting Tourist Behavior through LLMs"
- Graduated with **100/110**

High School (Computer Science), *ITT-Marconi Rovereto* — 2017 – 2022, Rovereto (TN)

- Scored **92/100**

HACKATHON

Lovable x Yellow Tech Hackathon — 2025, Milan

- The first Italian "**Vibe Coding**" hackathon, building a fully functional MVP in under 6 hours using natural language.

Al Automation Hackathon — 2025, Milan

Designed complex workflows using **N8N** and AI Agents to automate business processes.

EPICURE Hackathon GPU, *CINECA* — 2024, Bologna

Understanding of OpenACC and CUDA directives on the Leonardo Supercomputer and then some profiling with NVIDIA Nsight Systems.

VOLUNTEERING ACTIVITY

Trentino Sviluppo | AI Sprint 24h, *Technical Mentor & Staff* — 11/2025 – 11/2025
TSpace, Rovereto

Mentoring participants on using Generative AI tools (Lovable, OpenAI) to build their first digital products.

Collegio Don Mazza, *International Educator & Volunteer* — 07/2024 – 08/2025
Brazil

After a competitive selection process I was chosen to participate in international volunteering in Brazil.

Downhill World Cup, *Track controller* — 01/06/2021 – 07/2021
Val di Sole

during the race days I was in charge of controlling the track

PERSONAL PROJECT

Resvo, *Open Source Reservation System* — 01/2026 – Present

An open-source restaurant reservation system built with Next.js and Supabase to replace analog booking methods with a high-performance digital interface.

CampFlow, *Campsite Management System* — 12/2025 – Present

An open-source management platform aimed at modernizing campsite hospitality

Wealth Compass, *Financial Operating System & FIRE Calculator* — 11/2025 – Present

A privacy-first financial operating system using React, TypeScript, and Supabase to unify expense tracking, investment portfolios, and real-time Net Worth calculations.

Mattioli.OS, *Personal Operating System & Habit Tracker* — 10/2025 – Present

My "Second Brain" for personal productivity ecosystem using React and Supabase to integrate habit tracking with long-term goal management.
