PROFESSIONAL SUMMARY

Computer Science graduate focused on AI-driven product development and rapid prototyping. Built and launched multiple tech products, including an LLM-based research project, open-source SaaS tools, and a gamified cybersecurity learning platform. Scaled a vertical media brand to international partnerships (e.g., Swarovski Optik), combining technology, content, and community growth. I'm driven to work on high-impact challenges where I can turn emerging technologies into real-world value.

WORK EXPERIENCE

Junior Back-End Dev, *Institute Itech* — 06/2026 – 09/2026
Back-end dev in various projects of the Institute Itech Company — Milan
